

Here is the modal code that we are going to use in the next lecture:

```
<!-- form modal -->
<div class="hidden relative z-50" aria-labelledby="modal-title" role="dialog" aria-modal="true"
id="form-modal">
  <div class="fixed inset-0 bg-gray-500 bg-opacity-75"></div>
  <div class="fixed inset-0 z-10 overflow-y-auto">
    <div class="flex min-h-full items-center justify-center p-4 text-center" id="backdrop">
      <div class="relative transform overflow-hidden rounded-lg text-left shadow-xl transition-all
my-8">
        <form action="" method="POST">
          {% csrf_token %}
          <div class="bg-white dark:text-white dark:bg-slate-300 pt-5 pb-4 px-8">
            <div class="mt-3 text-left">
              <h3 class="text-2xl font-medium leading-6 text-gray-900" id="modal-title">
                <!-- title -->
              </h3>
              <div class="mt-3">
                <!-- form -->
              </div>
            </div>
          </div>
          <div class="bg-gray-50 dark:text-white dark:bg-slate-400 px-4 py-3 sm:flex sm:flex-
row-reverse sm:px-6">

            <button type="submit" class="bg-transparent hover:bg-blue-500 text-blue-700 font-
semibold hover:text-white py-2 px-4 border border-blue-500 hover:border-transparent rounded">
              save
            </button>

            <button type="button" id="cancel-btn" class="bg-red-500 hover:bg-red-600 text-
white font-semibold py-2 px-4 border border-red-600 rounded mr-3">
              cancel
            </button>
          </div>
        </form>
      </div>
    </div>
  </div>
</div>
```
